Pasco, Washington 99301

Dear Ms. O'Neil:

Enclosed is the key to the groundwater wells located at the Pasco Sanitary Landfill, as you requested. Since these are water quality monitoring wells, please be sure to decontaminate all equipment used for sampling before use, and between use at the different wells. Please call Jack Sceva (206) 442-1641 if you have questions about decontamination procedures. Thank you.

Sincerely,

Lori Cohen
Site Manager
